**DETAILED ACTION**

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

The best US prior art Gazzuolo (US 6,546,309) discloses the teaching of evaluation marks that are quantitative in a range from a lower mark to a higher mark. But, the best US prior art lacks at least the teaching of assigning by a computer system to the customer the category that corresponds to a human model having individual characteristics corresponding to the body measurements of the customer.

The best foreign art (KR 2001-092993) teaches a virtual clothing marketing method where one can dress a virtual model in clothes the purchaser wants to buy. But, the best foreign art lacks at least the teaching of assigning by a computer system to the customer the category that corresponds to a human model having individual characteristics corresponding to the body measurements of the customer.

The best NPL (*Accounting and the Internet* by Andrew Bailey) teaches selecting human models representing categories of a pre-set classification of goods, trying on the goods by the human models of the respective categories, and obtaining body measurements of a customer to determine which category in a pre-set classifications of goods the customer belongs. But, the best NPL lacks at least the teaching of assigning by a computer system to the customer the category that corresponds to a human model having individual characteristics corresponding to the body measurements of the customer.

The limitations lacking in the prior art, in combination with the other limitations clearly claimed in the application, are novel and unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
